H6500E Series 4K UHD ANDROID TV

Model # 58H6550E

## I'm smart, attractive and entertaining

With four times more pixels (8.3 million) than standard high-definition TV, an Android OS with built-in apps and Google Assistant for voice control, the Hisense H6500E Series 4K Ultra HD Android Smart sets the standard of what a TV should be.

Pictures are delivered in bright colors and rich contrast while HDR\* technology maximizes brightness. The UHD Upscaler brings lower resolution content as close to 4K as possible and Motion Rate 120 keeps up with the fast-moving sports, movie scenes and 4K games. This series also works with Amazon's Alexa. All summed up, this TV is a big deal!

### 4K resolution and Upscaler

With over 8 million pixels, the Hisense H6 Series offers a crisp, clear picture when compared to Full HD. And thanks to our UHD Upscaler, which brings lower resolution content as close to 4K as possible, your favorite movies, games and shows are ready to be seen in a whole new light.

### High Dynamic Range (HDR)

Dolby Vision HDR\* and HDR10 boosts the contrast of every image while delivering vivid, deep colors. With enhancements to the darkest and lightest areas of the picture, HDR\* delivers an image that looks closer to life.

\*HDR viewing experience will vary by model, content availability and internet connection.

### Motion Rate 120

Don't struggle to keep your eye on the ball—enjoy fast-paced sports, movies and 4K gaming without the lag. Featuring Motion Rate 120 image processing technology, the Hisense H6E Series keeps the thrills coming by reducing judder during fast-moving scenes.

### Android TV

Customize your entertainment with a familiar friend. The Android TV operating system gives you access to the most apps, content and entertainment.

### Google Assistant

The Hisense H6500E Series is instantly compatible with Google Home and comes with Google Assistant built into the TV, so it's always ready to answer questions, make recommendations and perform actions via web services. Just tap the voice control button to start controlling your display—play, pause or turn up the volume.

### Works with Alexa

The voice control functionality enables the TV to work with Alexa (through Amazon Echo) and check your calendar, report sports scores, and many more cool things.
